

COVID-19 Statement

Ipsum delivers essential services in the water and electricity sectors that are categorised by the government as critical to maintaining the UK's utilities and infrastructure throughout the COVID-19 pandemic.

To enable us to continue to operate effectively, we have established a Pandemic Response Team that continues to develop and implement the appropriate measures to be taken to ensure we maintain the highest standards of health, safety and wellbeing for our people, our customers and the communities in which we work.

We have developed a Pandemic Resilience Plan and undertaken a Risk Assessment for our office, vehicle and on-site workplace settings, implementing COVID-secure working practices and environments.

We inform and advise our people of any updates to government guidance and legislation in responding to the pandemic and review and update our Risk Assessment and working practices accordingly.

The risk ratings have been determined on a basis of Likelihood x Severity to calculate the overall risk ratings.
